

KN95 Protective Mask

Product introduction

Company introduction

Company introduction

DIGIMAX group registered DIGIMAX Hong Kong Trading Company in 2008, Fuzhou established an office in 2008; DIGIMAX group is headquartered in Shenzhen city, China, branch offices in Hongkong, Fuzhou, Chengdu city, China. The production base in Putian city has a self-built 20,000-square-meter building. With Professional medical equipment production workshop, a large number of high-quality technical and management system, which is committed to providing high-quality products and services.

We focus on Electronic measuring tool, Thermometer, and hygrometer, invested in the medical masks industry, with its own masks workshop, automatic mask machine with a production of 800pcs per minute. Passed ISO13485 certification, it authorized to medical product manufacturer only in China, which means we're able to well control the quality system in factory with a clear ISO system. We're the only factory passed BSCI certificate in Fujian province which can guarantee our products are produced based on international standards.

The product enjoys high quality reputation in overseas markets such as Europe, America, Southeast Asia, etc., and the company has developed rapidly. With experience of working with overseas chain stores, we think from customer's request and care of our reputation in a long-term vision.

PUTIAN JOKO ELECTRONICS CO., LTD.

Address: No.4099, Guohuan East Road, Xicun, Jiangkou Town, Hanjiang District, Putian City

Independent packing

How to use

1. Open the mask to make the nose clip at the top, and pull the ear straps with both your hands.
2. Hold the mask against your chin to completely cover your nose and mouth.
3. Pull the ear straps behind your ears and adjust them to make you feel comfortable.
4. Use both your hands to adjust the shape of the nose clip. Place your fingers in the middle of the nose clip and Press it inwards while moving your fingertips along both sides of the nose clip until it is pressed to fit the bridge of your nose.
5. Cover the mask with your hand and exhale vigorously. If you feel the air escaping from the nose clip, it is required to tighten the nose clip.

Equipment

High-speed slicer

The slicer is the first process in the production of masks. It mainly combines several materials as needed, welds and cuts into pieces. This equipment is modified by a circular knife machine. One machine can produce cuts in two groups at the same time, 480 pieces per minute, 690,000 pieces masks can be produced per day, now we have total two slicers in factory. It can produce KN95 masks with 3-5 layer, The material order of each layer can be adjusted according to customer requirements, speedy, high precision, neat and tidy appearance.
